

Non-Phthalate Plastisol Inks (Midori Series)

High Opacity (HO)

Applications

- Direct printing
- Medium to dark colored garments
- 100% Cotton garments
- Cotton/Polyester, Acrylic & Polyester garments (with LB underlay)

Features

- Low build-up
 - Easily releases from the screen
 - Very soft hand
 - High opacity for great coverage
-

General Info:

High Opacity (HO) inks are formulated to be directly printed onto medium to dark colored, 100% cotton garments. These inks provide great coverage and have a creamy body unlike most High Opacity inks, therefore making the ease of printing more simple.

Bleed Resistance: None

Opacity: High

Storage: Ideally 65° to 80°F. Keep out of direct sunlight.

Mesh: 86-240 (34 to 110 threads per cm)

Stencil: Any direct emulsion or capillary film.

Wet on Wet Printing: Can be printed wet-on-wet to increase production.

Modifications: To reduce viscosity use Curable Reducer (I10-9906), improve stretch use G&S Base (I10-1020), puff use Puff Additive (I10-9903), extend color use Soft-hand Base (I10-0111) & for suede puff or dulling use Suede Additive (I10-9907).

Squeegee Hardness & Angle: Medium to hard at a 45 degree angle.

Flashing: 700°F for 9 seconds, just enough for the surface to be tack free.

Squeegee Blade: Sharp.

Fusion/Curing: 325°F/163°C for 1 to 1 ½ minutes. Oven temperature can be increased and dwell time decreased. For heat presses use 390°F/195°C for 8 seconds.

Wash-up: Any plastisol cleaner.

Special Notes: PVC inks are thermoplastic compounds that require heat to fuse or cure. If ink rubs off on a white cloth or cracks, temperature and/or dwell time should be increased. Do not dry clean and always test on fabric to be printed.

Standard Colors:

(Refer to Standard Color-card for color reference)
